Dear Adarma team,

I am writing to apply for the job of Digital Library Software Developer. My name is Yasha Duncan-Wilson, and I'm a self-taught developer working primarily in Python with FastAPI and SQL, but with significant experience of React, vanilla JS, and HTML/CSS. While I have no formal experience, I have undertaken several projects for clients in the past with success.

Currently, I am indefinitely postponing my studies at Heriot-Watt university for medical reasons, and hope to instead build upon my experience by finding a long-term position where my willingness to learn new technologies and operate in a hands-off role fits and compliments the existing team. I have previously been described as 'self-motivated' and 'a results-focused individual' and am equally comfortable working as part of a team or independently.

My experience of building projects in Python and FastAPI, alongside my experience of owning technical projects from conception to deployment during my time as a freelancer, makes me an excellent candidate for this role. I use Git as standard on projects and am passionate about writing effective documentation for myself and others - I pride myself on my ability to communicate information clearly to technical and non-technical stakeholders alike. I feel strongly that my background and skillset would make me an excellent addition to the team at Adarma.

Thank you for your time and consideration,
Yasha Duncan-Wilson
